SOLID SURFACES

A composite that can be cast into nearly any form or size, and with large variations in colors and structures. The solid surfaces products have exclusive and fine luster that often surpasses the ceramics or acrylic/ABS made products. Other characteristics also include the high dimensional accuracy and joints free that can prevent dirt between basins and surrounding surfaces. Most importantly, the products are easy to be cleaned and polished in maintenance.

The products are also mechanically strong, tested, and approved in accordance with both European and American standards.

REPAIRABLE, DURABLE

An inert and non-toxic material, which is easy to be repaired and restore its initial aspect furthermore, with the clean production process, chemical reaction is mainly taking place inside the cast molding which makes our products even more environmentally friendly.

ANTI-MILDEW, EASY CLEANING

An anti-mildew material, any stain in products, just use neutral cleaning grease to eliminate. for hard scratches, or deep stained dirty, the appropriate sandpaper may needed for deep and thorough maintenances.

SEAMLESS FABRICATION

only with ordinary carpenter's tools, all types of fabrication work of solid surface can be completed. besides, it possesses excellent ductility; it can be easily bent into various shapes. with the help of fabricators, many stylish products can then be developed in our newsletters.

We has three finish ranges,

solid surface in matt

solid surface in glossy

solid surface in SolidColor

It can be produced with black, grey, minerals or any other customizable colors.

The natural feel-good factor

A veneer comprises thin slices of wood that are produced either by sawing, cutting or peeling the trunk of a tree. They are then adhered to a substrate. As with every tree, each real wood veneer is a unique piece of nature. Every piece of veneered furniture is thus unique and the differences in structure and colour indicate the distinctiveness of the materials used. With their great aesthetic appeal, real wood veneers give our bathroom furniture a high-quality look and are also warm and pleasant to the touch. To ensure that this remains so for a long time to come, the surface of the wood is also protected with a layer of melamine resin.
